PROJECTS DONE:

ACADEMIC PROJECT

Title : Cursor movement through finger by gesture recognition

The project is about to make user interface more realistic and ease of use. The end user could use is hand as a input device, for that OpenCV library provides Image processing that can be used for tracing human hand converted into the vector coordinates.

APP DEVELOPMENT:

Title : Facebook application development – Auto Like (https://graph.facebook.com/202878196541892)

It is a PHP based application for Facebook. This application uses Facebook HTML and Facebook JavaScript SDK as front end and Facebook PHP SDK as server side access with MySQL support. This application currently has 10,000+ monthly users and 6000+ daily page views.

WEB DEVELOPMENT:

Title : Database Monitoring System has been done for King Institute of Preventive Medicine, Chennai.

This website monitors the daily patient activities and viral disease statistics. The website was created by HTML and JavaScript in client side and PHP and MySQL in server side. It has login page with the roles of user Admin, Staff and Viewer. The admin has the privilege to grant Staff and Viewer access, Staff who actually enter patient details and other viral information, finally viewer who can only see the patient and diseases details in certain time. (i.e.) Chennai City Corporation is the one who has Viewer access and monitor the day by day virus activity.
